

10th BIOFORUM

May 17th, 2006,

Amphithéâtres de l'Europe,

University of Liège.

Sart-Tilman, Belgium

Register now

for the 10th Bioforum

A one-day meeting at the University of Liège between Bio-industries and young Life Sciences researchers

Sharing knowledge is essential in developing new fields of innovation and opens the way to economic growth.

The organizing committee is pleased to invite you to the 10th edition of the BIOFORUM, a unique one-day meeting between Bio-industries representatives and young researchers in Life Sciences. Since the first edition eleven years ago, the Bioforum concept has always offered Life Sciences PhD students a chance to freely participate to a multidisciplinary meeting, to show their skills and to experience communication.

More than 500 participants from Belgium, Germany and The Netherlands, and a session of about 150 posters have led the previous editions to be successful.

The 2006 edition will include :

- **Conferences** on research and development topics, by leading scientists and Bio-industry representatives;
- a **Commercial Exhibition** for vendors and service providers;
- a **Job Fair** especially intended for PhD students;
- a **Poster Session** with PhD projects of which 5 will be awarded 400 to 1.000 €.

Information on scientific programme, conference topics, free registration, access maps, commercial exhibition, are available our website:

<http://www.bio-forum.org>

Registration

To register directly, click here

<http://www.bioliege.ulg.ac.be/online.php>

The deadline for abstract submission is April 14th of and all registrations will be closed on April 29th of 2006.

Advertising, exhibition and sponsoring

Previous editions of the Bioforum have shown to be also a success in terms of commercial exhibition, matchmaking and direct exchanges. If your company is interested in advertising and exhibiting in this meeting please click here:
